

## **APPS Fellow**

### **Professor Giles Hardy**

#### **Forest pathology and natural ecosystems; ecosystem function and health**

Professor Giles Hardy is an expert in forest pathology and natural ecosystems, in particular, how biotic and abiotic plant diseases impact on ecosystem function and health.

He has research collaborations in remote sensing, eco-hydrology, entomology, molecular plant pathology, plant physiology and nutrition, fungal genetics, microbiology, soil health, restoration ecology, and native fauna among others.

Professor Hardy is currently Director of the State Centre of Excellence on Climate Change, Woodland and Forest Health, and Director of the Centre for Phytophthora Science and Management.
